KETAMINE FOR SEVERE DEPRESSION AND CHRONIC PAIN

Perhaps you or a loved one is suffering from severe depression or chronic pain and it's come to the point where traditional therapy has failed.

KETAMINE IS A GROUNDBREAKING TREATMENT FOR SEVERE DEPRESSION AND CHRONIC PAIN AND IT WORKS QUICKLY.

Ketamine is a well-known and widely used anesthetic. It's been used safely for decades as a sedation for operative procedures. In the last 10 years, it has been discovered that it can treat severe depression and chronic pain. While the exact reason as to why Ketamine works so well is not yet known, it is thought to work as a reset to the brain, restoring neurotransmitter function and improving mood and energy.

As the only service provider in the greater Charlotte area to provide personal IV hydration, we're very excited to be one of the very few offices in North Carolina who now offer Ketamine treatments in the comfort of our Hydrate Medical clinic and spa.

FURTHER QUESTIONS OR TO SCHEDULE TREATMENT:

Email info@hydratemedical.com or call our office at 980-352-0042 and we'll be happy to assist you.
We require a referral or approval from your PCP or psychiatrist.

Who is it for?

- Those who failed traditional therapy for severe depression and anxiety
- Those who suffer from PTSD
- Those who suffer from chronic and debilitating pain

What to expect?

The dose of Ketamine used in the personal IV infusions is small and will not cause you to go to sleep. We'll take your weight and height measurements and the severity of your depression into account and customize the infusion for you.

What results can you expect?

We wish we could guarantee you'll feel better after treatment, but there is no guarantee. Between 70-80% of clients see a greater than 50% reduction in their depression symptoms after 6 treatments. What we will know is during your first treatment if it's going to work for you or not. You can expect mood improvement 3-4 hours after treatment. A series of treatments over 3-4 weeks is required for longer lasting effects. Side effects are minimal and infusions take approximately 45-60 minutes.

Ketamine for Severe Depression

Costs:

- 1 hour IV drip per visit
- 6 treatments over course of 4 weeks
- \$450 first treatment
- \$400 further treatment

Ketamine for Chronic Pain
